Structural Engineer

Description

Structural Engineer – Precast Concrete – Middle East
Attractive Six Figure Tax-Free Salary + Living Allowance

Join a leading **precast concrete specialist** in the Middle East, delivering innovative solutions for large-scale commercial, residential, and infrastructure projects. We are seeking a skilled **Structural Engineer** to design and oversee the production of precast elements, ensuring quality and efficiency in every project.

Key Responsibilities:

- Designing and detailing precast concrete structures to meet project specifications.
- Conducting structural analysis and calculations.
- Collaborating with project teams to optimize designs for production and installation.
- Ensuring compliance with international and local engineering standards.

Requirements:

- Degree in **Structural or Civil Engineering**.
- Proven experience in precast concrete design and detailing.
- Familiarity with design software such as AutoCAD, Revit or STAAD Pro.
- Previous UAE or GCC experience is a plus.

Why Join Us?

- Work on high-profile projects in a thriving sector.
- Competitive tax-free salary with generous living allowance.
- Opportunities for professional growth in a dynamic team.
