Truss Designer

Description

Truss Designer | Timber frame | North Hertfordshire

Up to £48,000 per year plus pension

Are you passionate about precision engineering and structural design? Do you have a knack for transforming architectural concepts into robust, efficient and innovative designs? Then Join our clients in house design team as a specialist Truss Designer.

About:

Our client is a specialist manufacturer and supplier in the field of timber frame construction, dedicated to delivering their products to architects, builders and developers across the UK. Their commitment to quality, innovation and client satisfaction has created a new opening for a skilled and creative Truss Designer to enhance their dynamic team.

Role:

As a Truss Designer, you will be responsible for crafting detailed truss designs in 2D & 3D CAD that align with specifications, ensuring structural integrity and compliance with industry standards. Collaborating closely with architects, engineers, and project managers, you will play a pivotal role in translating design concepts into practical, high-quality truss systems.

Key Responsibilities:

- Develop precise truss designs using industry-standard software and tools.
- Collaborate with cross-functional teams to integrate truss designs seamlessly into construction projects.
- Conduct structural analysis and ensure designs comply with safety regulations and building codes.
- Iterate and optimise designs to enhance efficiency and cost-effectiveness.

Requirements:

- 3+ years proven experience in truss design, preferably with a manufacturer, specialist contractor or engineering practice.
- Proficiency in CAD software and other relevant design tools.
- Strong understanding of structural engineering principles and building codes.

Please upload your CV below or email your resume and portfolio showcasing your truss design projects to jamie@speyhawk.com. Please include the reference: "Truss Designer JP893" in the subject line.
